

# The Grand Illusion

© 2009, 2010, 2011, 2012 Arto Juhani Heino

*Regarding the Bilderberg Group – Illuminati – Masons - Rothschild - Hidden Orders - Banks - Oil Cartels*

## ***Distractions, Diversions and Outright lies***

*History has shown that the simplest method of gaining control of the masses is to keep the public undisciplined and ignorant of basic system principles on the one hand, while keeping them confused, disorganized, and distracted with matters of no real importance on the other., as the king said “Feed them cake”, a euphemism for a dietary distraction from their wretched plight while committing generations of his subjects to abject poverty and serfdom for the rest of their lives.*

***This is achieved by:***

- 1. Disengaging their minds, sabotaging their mental activities, by providing a low quality program of public education in mathematics, logic, systems design, and economics, and by discouraging technical creativity.***
- 2. Engaging the focus of their emotions by promoting and increasing selfish, self-indulgent and self centered behavior and their immersion in emotional and physical activities, by:***
  - a. Unrelenting emotional affronts and attacks by way of a constant barrage of sex, violence, sport and wars in the media - especially on the TV, newspapers, Internet, computer games and continuous advertising.***
  - b. Giving them what they desire , in excess ; junk food for thought and by depriving them of what they really need. Junk like; game-shows, sports shows, radio chatter, pornography, mobile phone chat, texting, Internet social networks like twitter, facebook etc. Also the real junk food that will keep them addicted to fat, sugar and starch this will keep them preoccupied with food and health issues and diets etc***
- 3. Rewriting history and law and subjecting the public to the deviant creation, thus being able to shift their thinking from personal needs to highly fabricated outside priorities. Diversions like - war on terror, boat people, global warming, etc . False history by omitting certain events, people and corrupting the true understanding of how a society was built, falsifying ancient historic lineage.***

*Hiding the history and the nature of the psychological control weapons that will be used on them. The main rule is that there is more profit with more confusion. Therefore, the best approach is to create the problems and then offer the a range of unsatisfactory solutions filled with loopholes that detracts from the true needs of the society.*

### ***MEDIA:***

*Keep the adult public attention diverted away from the real social issues, and captivated by matters of no real importance. eg sports events, music concerts, celebrity life styles, blockbuster movies, cartoons, food shows, game shows etc. A continuous blitz on every available TV, Radio and Internet channels, even during shows with scrolling propaganda at the bottom of your screen, sometimes faded into the each of the corners. This will ensure your are primed and filled with enough information so when the Add, News or station program break occurs you will be informed*

*with enough to complete the mental picture of the false reality, this will insure you will treat this as truth, repetition becomes indoctrination by stealth. The giant media corporations manipulate and cherry pick news items to sway the public into creating opinions that are loaded in the favor of the particular agenda, human interest stories are used to high-light the humanitarian doctrine of some large corporate groups, like WWF, that are secretly owned and funded by the cabal.*

*Give complete coverage to the sports world-wide. Allow great profits from any type of sport, this will assure its proliferation into most peoples lives, eg horse racing, football. Highlight the health aspects of precipitation in sport, this will keep the mind diverted from the control mechanism present. The truth is most people who participate in sports suffer greater ailments from their participation in it. The competitive nature of sport will also help keep the society divided, this has the added bonus of making fanatics who will promote the cabals agenda.*

### **SCHOOLS:**

*Make a good education both too expensive and difficult by creating a menagerie of useless courses that make learning complex, difficult and guided away from crucial primary knowledge. Keep the young public ignorant of real mathematics, real economics, real law, real history and the true nature of physiology and its impact on the human mind. Praise rote learning, ignore and ridicule original thinking. Elevate sports people and public commentators with low IQ's as role models for children. Games shows that reduce historical events to a sound byte. Jingoize false facts and knowledge. Trivia now becomes knowledge, true knowledge is hidden from public view, books will be digitized and e-books will be the norm. The rejection and control of information can be manipulated before you read it. School textbooks would omit any references to any knowledge or people that allows alternative solutions to mainstream problems, eg Nicola Tesla, Wilhelm Reich, Victor Schauburger, Raymond Royal Rife etc*

*Public education teaches students to follow orders and the directives of government, no creativity unless strictly supervised and directed for the proletariat's goals. The curriculum is designed to dumb down the public, no hints on real learning, just follow strict rules and guidelines only. Private education limbers up a layer of society that physically rule the workers and in turn take orders from the governmental bureaucrats which take their directives from the politicians.*

*The current toolbox of diversion is the cost of higher education, by charging the students and stacking up their debt, they are now bound to debt repayment servitude for at least a good proportion of their careers. There is no guarantee of jobs after University/College so the extra stress is compounded and made to keep the student preoccupied by these matters on a monthly basis. They will not have enough time to worry about how they are getting screwed by the system, when the standards have dropped and it is very easy for everybody to get a degree, there will be a glut and the degree will be worth very little because of it, this will only be understood many years after graduation.*

### **SCIENCE:**

*Give stature to compromised academics who can be presenters of extreme abstract concepts such as String Theory, Quantum Physics or Relativity which are totally divorced from our real world, thus keeping the truth of a scientific reality lost in the semantics and word play that fill theoretical physics, theoretical cosmology and all the false mathematical models. The irrational Quantum and Relativity THEORIES take on Religious aspects and are required acceptance or the students fail, this keeps the flame of stupidity alight and true understanding in the dark, thus filling the mind with highly dubious theories and useless information. Thereby blocking understanding of self regulating systems and denying the truth of the underlying nature of reality preventing the true understanding*

*of the wheels of nature that would give us free energy machines, anti-gravity, abundance and open clean systems.*

*Hide the real technology from the masses, such as climate engineering. This technology can be used to effect disasters all over the world, causing havoc to economic situations. This technology along with propaganda can strike fear and exert control over nations, climate change is now a silent weapon with mesmerized followers in all walks of life, they are now willing soldiers ready to defend this false agenda. Using the bandwidths of electronic fog(mobile phones, wireless tech) to keep the brain bombarded with unhealthy EM, and ignore its health implications(cancer, tumor).*

*The scientific peer review journals is the best place to stop any mention of free energy or any breakthroughs that might affect the current status quo. To co-opt this system, give credence to the science that fits the standard model of creating waste, high profit and feel good science. Any break through technology either dumb it down or ignore it implications.*

### **TECHNOLOGY:**

*Place this aspect of our current culture as THE MOST important change and direction in our generation, this will assure we all follow like lemmings to the world of iPod, Microsoft, Windows, Google, Facebook, Twitter and we can all live in CPU heaven talking about trivial daily events . This will shape the Job trends and stimulate massive human activity on software and hardware driving our temporary needs for superficiality and mediocrity against mans needs for future long term survival. The games industry will explode into multi-level interaction,virtual reality and on-line gaming competition, dooming the generation who is caught in its wake to computer addiction, maladjustment to reality and mental illness.*

*Fill the internet with websites that promote the good feel approach to the system facade , fill every corner and page with the same simple messages, allow the adds to follow you from site to site, this will keep everybody busy preoccupied with meaningless trivia without engaging in any research that might lead you to the truth of our current society and its problems.*

*To slow down the positive and useful aspects of the computer revolution and add a huge lump of paranoia into the mix, introduce the idea that some angry techno-mean kid in his room at home is creating a malicious computer virus to take down big companies, and in the process fills your on-line experience with virus created chaos. This is only a ploy, as the technical requirements to create the multitude of computer viruses that fills the Internet in a daily basis would amount to being a corporate structure that employs full time hackers. This IS what they really have done, and if anybody speaks up about this they will aim their cyber attack onto them with a fury. We know this is how they created the computer security industry, the legacy they have given us is firstly a constant reminder(Virus Scanners) and distraction of some lurking virus hiding on the Internet , ready to infect your computer and attack your private information costing you time and money to keep this monster at bay, secondly; is we now have less privacy and anonymity that in the history of this planet. We give our rights away on every program we purchase or use, read your agreement statement at the beginning of every software installation. Linux gave this corporate model a great scare, so they avoid mentioning this type of platform as it promotes the sort of ideas that they are afraid of.*

### **ENTERTAINMENT:**

*Keep the public entertainment below a sixth-grade level. Lowering the musical standards so they praise mindless and moronic music and behavior, such as Punk, Rap, Scratch ,Trance, Ambient etc. they own the industry, so crafted manipulation of lyrics and images are infused to keep their message repeated and subconsciously digested. Young artists would do almost anything for*

*recognition, so as they are the owners of the music industry they encourage uninformed, uneducated and undisciplined literary, musical and artistic re-creativity and the copyist mentality, making control over their image and output easy. A good example of this brainwashing format is the TV show "American Idol". Regurgitation of cliches, disengaging the acceptance of anything really new. Standards that are controlled by big media like - cartoons, sample libraries, fashion styles, news segments, reality shows, advertising, etc . Mobile phones will allow you to be diverted where ever you go, applications will keep the distraction level maximized, keep the focus on what THEY have for you.. Create followings of mindless babble and foolhardiness on Game shows, You-Tube, Radio shows and Live streaming of these types of events, this will keep the cattle from any real focus on any meaningful and important issues.*

*Promote a dysfunctional family lifestyle and abhorrent personal activity as a new norm, while promoting tolerance to deviant behavioral relationships. These shows will be defended as admirable and progressive, as humans in diverse family situations should be naturally tolerated and understood, but with their subversive script manipulation it will only be tolerated in a dysfunctional and deviant setting. This is a facade that hits the very core of human interaction, the freedom of expression and the rights of the individual. This again separates the voices of diversity and nulls the gains made by true humanitarian movements. This type of programming has led to a new wave of shows that promote immersion in the subject of criminality as a daily event, CSI etc*

### **ARTS:**

*This is one area that the system has trouble trying to contain, you see Artists are not easily manipulated, they generally like to think on their own, without outside coercion or influence, observation is their mantra and stepping outside society is the only way to achieve this.. The control mechanism is the funding issues, competitions and commissions, these must have strict guidelines as the content and the subject matter, you don't want artists making too many political statements that might embarrass the system overlords. To keep artists at bay you either starve them, break their bank account or keep them busy chasing funding, competitions and commissions. This type of programming has the effect of excluding the real artists from contributing to new thinking and creation, marginalize true artists by keeping them as true outsiders, we can't have them telling you how the world is outside the box.*

*The system will only promote a narrow definition of the Artist, 1 – The warm friendly out door landscape painter(passive art), 2 – The Serious Portrait Painter(need them to paint the leaders and promote the system authority), 3 – The serious Commercial Artist/ Illustrator(tool for the system), 4 – The Genius of Oil painting/Murals(implant a carefully chosen few to keep other artists looking their way) , 5 – The Genius Child painter(big distraction from real art), 6 – Cartoonist and Comic Artists(could be dangerous, still better to have on the side of the system), 7 – The Abstractionist(the complete fooling of the public on what art truly is), 8 – The Geometric Sculptor(keep the masses amused). These definitions are narrowly drawn up and are highly biased misinform-ants as these are the only types the system will allow to survive. If you are an artist that tries to truly inform the public on the visual field, you will most likely be ignored. Many real artists have a diverse pallet they use not just paint. The majority of people who enter the field of art, work at menial positions of paste ups, advertising, poster art and sign writing.*

*The Novelists, Screen writers, Historians, Biographers, Journalists and the Non fiction writers become the abettors of the knowledge of the age, they must be carefully controlled, and hand picked. The promotion and award system of these writers must be crafted as not to alert the populous of the bias of the system. They will allow many controversial books that are paraded as forward thinking and revealing, again this is a sham as they are just pushing the agenda in a direction that will not allow true dissent.*

## **WORK:**

*Keep the public busy, busy, busy, with no time to think - back on the farm with the other animals. Complicate roles in the work place with added rules and legislated interactions that hinder smooth work flow and discourage true free enterprise. Make sure all salable products have a limited shelf life, are unreliable and serve limited applications. Then try to fill your spare time with complex forms, contracts, accounts, difficult tax, superannuation and other governmental and private obligations, use legal threats so conformity to any new laws is accomplished, no time to understand the system just follow it or be doomed. This will also cause home life stresses and strains that will alienate the worker from a balanced family life, no time to think of the bigger picture.*

*Give corporations tax loopholes and allow them to buy up small business concerns, take the variety out of the equation and replace it with stylized easily mass produced items and designs that have a limited lifetime functional value(cheap molded plastic). Link corporations together to create a seamless identity that follows each others products, designs ideas and crafted identities. This will drive out true competition and avoid quality issues by lowering the standards of acceptable life limits on products and services. Allow corporations to run utilities, health care, prisons,transport and energy, this will assure that you will be working for or directly competing against the transnational giants, no hope of growing a business, so the small players fold and follow them instead. This means you will follow the corporate ethics code and they demand strict obedience when employed by corporate identities, corporate life is not democratic. Corporations lack true human ethics only the ethics of profit and monetary gain at all cost*

## **WAR:**

*Create many false wars on many fronts, War on Terror, War on Drugs, War on Pollution, War on Cancer this will not only strip our rights as individuals to make personal choices but also encourage the war mentality by creating a culture that seeks the war scenario of conflict, division and confrontation, this also has the added benefit of watering down the real horrific aspects of war. Use statements like "War is Peace", "To have Peace we Need War", this will cloud any arguments against war, the idea of having peace sometime in the near future is the carrot they dangle. The pundits, commentators and ex military service will write books and have lectures about how to achieve peace, meanwhile they move the goal post further and further away from any possible attempts at reconciling differences that actually make war within or between nations.*

*The great bogymen of terror/fascism etc is created either from a single country(Iran, N Korea) or an invisible groups (alqeda = AL CIA DA= of the CIA) that move freely in countries or near your borders(eg USA/Mexico), this is to keep the legislators busy on taking away our liberties while we begin to suspect anybody who is different to the crowd. This maintains the discomfort we feel about people who think differently, this also helps to give rise to racism and division amongst communities and nations, where a policy of multiculturalism will help this divisive agenda along. This has been helped by each third world nation creating a steady stream of refugees to first world countries adding to the prejudicial agenda. No time or energy to really help anybody we are too busy with too many other problems, so we lock them up, this creates a festering hatred within differing communities.*

*Start wars in third world countries, by infiltration of false social expectations by inserting an invisible anti-group that people can be attracted to, then feed the followers with the idea of revolution as the only alternative to their countries social and economic dilemma. This will create zealots and groups dedicated to unreal causes, preoccupying vast amount of people in these matters. Supply arms to both sides of these conflicts. When this has been accomplished and the*

*people are weary, reinstate a similar regime and let the people make heroes of the new leaders, after 20 or so years repeat the same. The organizations that promote the politically neutral activities such as the UN Health, Food and Security forces that come into countries of strife will be funded by the elite so as to show great philanthropy at work increasing their stature amongst the world's public.*

### ***POLITICS:***

*Keep the number of political parties down to two, this will keep the public polarized. If required to push certain issues, create a radical third party that disguises itself as a supporter of free individuals, only to be really pushing a corporate agenda, that is secretly the issue that is pushed by the other two parties, when presented as a people's issue the other two parties will adopt it, only to show they want what is best for the people. Preach Liberalism and Freedom to create class warfare. Make the followers of left hate the followers right and visa versa. This will also create a class of pundits and commentators that continuously debate our divided ideologies, this keeps the arguments festering, support emotive announcers and biased presenters, causing much strife and it will further divide people, this will advance their cause.*

*Set high moral policies and let the opposition water down its application, this will create great public debate and furor, distracting the public eye from any real issues, then the opposition wins government and process repeats until all the people's rights have been eroded and the required draconian laws have been passed.*

*Just remember they created the system so there will be two opposites working against each other to keep the division of society alive, while together in collusion they put the hidden agenda into place, and you will be no wiser. We must see past this veil before we can truly act and change this corrupt system. The media play a big role in the public political debate, the corporate agenda and political outcomes can be steered by biased reporting and so called news networks. Giving the impression of a democratic system, but being loaded by hidden meanings and the talking heads of a one-sided political debate.*

*Allow local government to create by-laws that press greater hardship on the community and greater hurdles to jump when activities require approval. Start revenue raising so as to deplete households of any savings, rates, parking tickets, permits etc. The basic agenda will be the same regardless of the political party in government. The route to the final outcome will be the only difference between any party in power, the objectives will always be the same, keep the public worried about these issues and nothing else. All politicians were trained in the same class, the debate is where they play the game, without the debate game we might figure out the rules ourselves and find out the truth.*

*The name trading of different political systems of the past are continuously brought up and are tarring their opponents with the stain of communism, fascism, right wing, left wing etc. They are there to keep you preoccupied with the differences between the ideologies and not what is being really pushed by current parties of today. This is a dogmatic approach to political debate, where they set the rules for public intercourse and will not allow ideas that might reveal their system of lies that might be exposed. The common method is to change the words of the argument but never change the argument, this way the hidden message can still languish in the public mind.*

### ***RELIGION:***

*Allow religions to flourish, under strict guidance using only one book as a guide, make sure there is enough differences in each faith to cause basic conflict. Apply standards like regular scripture*

*reading, prayer meetings, extra services and group activities to keep the followers on track. The supernatural belief system that forbids questioning or defying the leaders should keep most followers away from questioning the true origins and history of their faith. The heads of each church align themselves so as to act in concord with the politics and rule of each nation that houses them, together, the complete control of the masses hearts and minds are assured. Destroy and vilify any belief system that is not sanctified by the ruling class, Waco was a good example of what can happen when a rogue religion points its finger and accuses the government of being in allegiance with the dark forces of mankind, this sort of open defiance would make people ask questions about our leaders intentions, this would awaken some sleepers.*

### **ECONOMICS:**

*The meaning of economics in its inception from the early Greeks was the management of a household administration, this had little to do with money, banks or even politics, it has only been translated in the last 100 years into money based meanings. This way they keep the minds preoccupied with money, both the love of it and the need for it, divide society into rich and poor. Money worries and retirement funding crisis are tools to keep your mind off the real issues. Create a banking or monetary crisis, then bailout the banks and/or industries, shutting down industries and services that are useful and rebuilding those that offer very little but promise a lot, this will keep the public preoccupied with the differing standards of service. Offer financial help then funnel money out of the system into creating a debt problem, then the compromised politicians will demand a cut in spending, causing more stress to the system. This will keep many distracted by trying to find a way to manage their organizations running costs, this will devastate society hurting those in need and ruining any chance of a true recovery. These tactics will require the public to be divided on government debt repayment, this crisis will allow new laws to be passed that will usher in the beginnings of the peoples servitude to a debt ridden society.*

*Adding to the economic and banking crisis, whole nations would now be under pressure to pay outstanding debt, to alleviate the crisis an assurance of austerity measures would be promised, if the default continues, repayment by the core wealth of the nation would be handed over eg gold, silver. These austerity measures would impose draconian laws as to increase hardship and stress, again this is to make sure the people will have no resources or will to mount any opposition to these measures.*

*Oil is one of the tools to corrupt government leaders and officials in many nations, offer monetary rewards so oil companies can extract a cheap supply of oil for their local market reaping in large profits. Threaten to destabilize the region, war or even assassination if the game plan is not followed.*

### **HEALTH:**

*Putting chlorine, fluorine and aluminum in the water supply and stating that this is to purify the drinking water, when in reality the long term effects are Alzheimer's disease(Al), Fluorosis bone disease(F) and cancer and heart disease(Cl). The use of additives in staples like bread and milk are also another form of slow death. Your life will be a preoccupation with many health issues, no time or energy to expose or fight the system. Keep the references on needed health care plans constantly on show while in reality supplying low quality care at premium prices. Cause a crisis in this industry that will paralyze and divide society, promise to help the poor but in reality force them into private health that will exasperate their debt.*

*Supply and control pharmaceutical drugs for ailments that can be solved via natural foods, good diet and herbs. Drive the naturopaths into hokey medical categories then make it illegal for them to*

*practice without certification, this will squander the practitioners resources and time, no time to fight them. Through covert means of false standardization of procedural medicine the diversion from benign drugs of application into insidious toxic formulas have been created. Supply dangerous medicines to mild ailments, causing long term damage, too sick to realize what is going on. Allow the use of technology that will damage our long term health such as mobile phones causing brain cancer.*

*Give compromised high profile nutritionist the forum to influence the eating habits of the populace, then load the dice in favor of a bad dietary balance, this will ensure a generation of unhealthy people that will be ricochet into another round of manipulation to repair their problems. This should;d be made public as possible, include sports people and trainers to offset the mind and body damaging message(The Fattest Loser etc). The most damaging is the way they divide the nation into body types and degrade their humanity. This loathing and self-conscious approach to the body image affects some of the most vulnerable in society. This ploy will ensure a good proportion of the populous will not have the accoutrement to devote to any other purpose beside their own personal body image plight.*

*This is what occurred in the 1970's with that carbohydrate loaded diet, now this is type of propaganda is being used with a protein loaded diet. All these measures will keep the people focused on food in exclusion of everything else, this will create another generation who witness the families preoccupation, again this knock on effect will cause mental disorders surrounding food(Bulimia, Anorexia etc)*

*Discourage any form of mind altering drugs, it just might break the hold they have on you. Waking from the false reality can be traumatic for some people. Only addictive drugs that dull the mind and senses will be secretly promoted or as in alcohol openly available.*

---

### **Does any of this describe the world in which we all live?**

*Of course it does! We live in a society that finds itself continually fascinated with matters of no real importance - such as our obsession with celebrity news, television, computer games, sports and sports stars, super-models and movie stars. A great deal of effort is expended upon these meaningless diversions, such as the trials and tribulations of Oprah, Michael Jackson, Martha Stewart, Paris Hilton, and others who came before and of those who will follow. Entire channels are devoted to this form of tele-cinematic voyeurism, these channels also include shopping and product promotion, feeding the consumerist mentality and offering nothing more than a temporary shopping high..*

*The problem of disengaging from the melee of thought control, is mainly from the addictive nature of that control. The need to feel like you belong to the mass trend of this inducted way of life is their way of ensuring you promote their agenda without knowing why. The people that fall outside of that control are ridiculed and quite often misaligned by public opinion.*

*Our so called leaders of society are failures, they have never had the publics interests at heart only the constant building of a system of world wide control. When a true light rises from the trenches of this social mire, he or she is struck down, jailed, misaligned, ignored or even murdered and never to exert their influence over the coming events. A good example of a few such people are Kent Bentkowski , William Cooper, Victor Schauburger, Wilhelm Reich, Stanley Myer, Nicola Tesla and list grows larger every generation.*

**Are you ready to ACT?**

*Are you one of those who have the herd mentality or are one who can see through their deception?*

*Are you employed in an industry that make items or service support for their agenda?*

*Are you immersed or engaged in their diversion entertainment?*

*Are you helping those who are working to free your entrapment or are you condemning them?*

*If you have a friend, acquaintance or family member that is AWAKE to what has been stated here, do you listen to them and take their experiences seriously or do you just ignore them?*

*Do you measure up to being an awakened individual or do you prefer to stay as a drone?*

*Do you feel uncomfortable about all these implications? If you do then please go back to sleep.*

*If you are a brave soul, then ask yourself all those basic questions, again, will you act upon it?.*

## **What to do?**

*Here are just a few things you could do:*

1. *Change your viewing habits.*
2. *Change your listening habits.*
3. *Read books, real books not, "So So for Dummies" etc*
4. *Find alternative view points of all subjects on the net.*
5. *Understand that big TV, Newspaper, Radio etc NEWS are full of lies.*
6. *Change your diet, eat clean unprocessed food.*
7. *Wash with natural products.*
8. *Careful of what you drink, acidic blood is the first sign of a major problem.*
9. *Get out of debt as soon as you can.*
10. *Vote true independent, not big party.*
11. *Find artists, musicians, writers, etc that are no-label and read, look and listen.*
12. *Ignore the harping of commentators that try to sway public opinion.*
13. *Ditch the mobile phone and any other wireless system.*
14. *Get off the electric Grid.*
15. *Grow your own food.*
16. *Find ways to barter without money.*
17. *Be brave and speak out about the Emperor who has no clothes.*
18. *Stand together on these most important issues and unite*
19. *Study History without bias of winners and losers, just the culture not the wars.*
20. *Help foster a society that is not run by psychopaths - Lawyers, Bankers, Politicians*

*Thank you for reading, I hope you are a little wiser and good luck to a great life without the Big Brother meddling .... good luck, regards Arto*
